## Code snapshots of some successful elements

- `<html class="js no-touch acsb-light-contrast" style="" lang="en"><!--<![endif]--><head><meta name="acsbClient" content="true"><meta content="https://vchecksolutions.com" name="acsbAceBase"><meta content="https://acsbase.com/apps/ace/" name="aceEndpoi...`

11	The meta viewport tag should allow visually impaired users to pinch-zoom at least double the standard scaling using the user-scalable="yes" and maximum-scale={2 or higher} content strings.	Yes	Pass	-	100%
----	--	-----	------	---	------

## Code snapshots of some successful elements

- `<meta name="viewport" content="width=device-width, initial-scale=1.0, maximum-scale=5">`

12	The title tag of the HEAD section (also the title that appears in the browser tab and Search Engine result pages) should exist and describe the name of the current webpage for screen-reader users.	Yes	Pass	-	100%
----	--	-----	------	---	------

## Code snapshots of some successful elements

- `<title>Accept Checks By Phone, Checks By Fax, Checks Online. ACH Alternative</title>`

13	Letter spacing should not be set to below -1px in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%
----	---	-----	------	---	------

14	Elements that have texts should meet a minimum contrast ratio of 4.5:1 between their foreground (usually text color) and background color.	No	0	0	-
----	--	----	---	---	---

15	Font sizes should be at least 11px in size in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%
----	---	-----	------	---	------

# WCAG 2.1 AA Level Web Accessibility Audit

Website: vchecksolutions.com | Verdict : Compliant! | Date: January 29, 2021

16	Required form fields should include an "aria-required" attribute that equals to "true" so blind users using screen-readers know their validation.	No	0	0	-
17	Form fields should either include an "aria-label" attribute or a connected LABEL element describing the requirement of the field (email, phone, name, etc.).	No	0	0	-
18	Form elements cannot have the same ID, or else their corresponding label will provide false information.	No	0	0	-
19	aria-describedby and aria-labelledby attributes should be connected by ID to an element that either has text description or an "aria-label" attribute.	No	0	0	-
20	The validity status of every form element must be represented in the code at all times using the "aria-invalid" attributes and the "true/false" values, and change dynamically when the status changes.	No	0	0	-
21	All forms should have a submission button that is built as an input type "submit" or a "button" element, or include a "role" tag that equals to "button". Buttons can be hidden if the form can be submitted using the Enter key.	No	0	0	-
22	Search forms should include a "role" tag that equals to "search" (or be wrapped by one) to indicate a search landmark for screen-readers.	No	0	0	-
23	Menu items that have a dropdown menu include an "aria-haspopup" attribute that equals to "true".	Yes	5	0	100%

25	Menus should either be built using the HTML5 "nav" element or include a "role" attribute that equals to "menu" or "navigation" to indicate a navigation landmark for screen-readers.	Yes	Pass	-	100%
----	--	-----	------	---	------

### Code snapshots of some successful elements

- `<ul id="mega-menuv-788" class="mega-menuv right" style="" data-acsb-menu="ul" ><li class="nav-selected nav-path-selected top-level-nav first il-1 pl-1" data-acsb-menu="li" data-acsb-menu-root="true"><a href="/" target="_self" class="nav-selected nav-...`

26	Ratings/scores that are represented visually using stars, meters or other indicators should either have an "aria-label" attribute or a screen-reader only texts conveying the score/rate.	No	0	0	-
----	---	----	---	---	---

27	Visually deleted texts (often used to show a previous price of a sale) should include an "aria-label" attribute or a screen-reader only text that explains this is deleted text.	No	0	0	-
----	--	----	---	---	---

28	Making use of an accessibility interface helps to ensure that visually impaired users can adjust some of the UI and the design (font-size, colors, spacing, etc.) to their needs. It is not a compliance requirement, but can help to improve compliance.	Yes	Pass	-	100%
----	---	-----	------	---	------

29	Breadcrumbs main element should include a "role" attribute that equals to "navigation" and an "aria-label" attribute that describes the functionality."	No	0	0	-
----	---	----	---	---	---

# WCAG 2.1 AA Level Web Accessibility Audit

Website: vchecksolutions.com | Verdict : Compliant! | Date: January 29, 2021

30	Iframe elements should include a "title" or an "aria-label" attribute explaining the purpose, the functionality or the destination of the iframe, or be tagged hidden for screen-readers if irrelevant.	Yes	2	0	100%
----	---	-----	---	---	------

## Code snapshots of some successful elements

- ```
<iframe class="youtube-player" src="//www.youtube.com/embed/oloMEIjueXU?wmode=transparent" allowfullscreen="" id="fitvid44501" tabindex="0" aria-label="Youtube Iframe" data-acsb-force-navigable="true" frameborder="0"></iframe>
```
- ```
<iframe src="https://www.securevcheck.com/stats.php" tabindex="-1" aria-label="Securevcheck Iframe" data-acsb-force-unnavigable="true" aria-hidden="true" width="330" height="150" align="middle"></iframe>
```

31	Interactive elements that can be navigated using the keyboard should be surrounded by a visual outline whenever they are focused.	Yes	Pass	-	100%
----	---	-----	------	---	------

32	Interactive elements such as links, buttons and form fields should all be navigable using the keyboard by either using a focusable element (a, button, input, etc.) or including the "tabindex" attribute that equals to "0".	Yes	Pass	-	100%
----	---	-----	------	---	------

33	Every page should include hidden links that by clicking on them (either using keyboard navigation or a screen-reader), the user will "skip" certain blocks directly to main landmarks such as main content, menu or footer.	Yes	Pass	-	100%
----	---	-----	------	---	------

34	Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should include a "tabindex" attribute that is below 0, and have it dynamically changed to 0 when they become visible.	No	0	0	-
----	---	----	---	---	---

35	Active popups should include an "aria-modal" attribute that equals to "true", and a "role" attribute that equals to "dialog", so screen-reader users know how to navigate within it.	Yes	Pass	-	100%
----	--	-----	------	---	------

# WCAG 2.1 AA Level Web Accessibility Audit

Website: vchecksolutions.com | Verdict : Compliant! | Date: January 29, 2021

## Code snapshots of some successful elements

- `<div class="pp_pic_holder light_rounded " style="top: 374px; left: 681.5px; display: block; width: 540px;" data-="popup" data--blocker-by="a4e92yeazwnc" aria-modal="true" aria-hidden="false" aria-label="POPUP" role="dialog"> <div class="pp...`

36	Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should be wrapped inside an element with an "aria-hidden" attribute that equals to "false", or include it directly, and have it dynamically changed to "true" when they become visible.	No	0	0	-
37	Carousels should include an "aria-label" attribute that equals to "carousel"/"slider" or something else that indicates the functionality, as well as be tagged as a landmark for screen-readers using a "role" tag that equals to "contentinfo".	No	0	0	-
38	Control elements such as next and previous icons should include an "aria-label" attribute or a screen-reader only text that explains the functionality to screen-readers.	No	0	0	-
39	A common accessibility mistake is to treat carousels as live regions using the "aria-live" attribute and the "polite" or the "assertive" values. Using this practice will cause screen-readers to cut and skip announcements.	No	0	0	-
40	Carousel pagination items (usually used as small dots at the bottom of the carousel) should indicate their functionality and slide number they control using an "aria-label" and a screen-reader only text.	No	0	0	-
41	Font icons, SVG or images that are being used as spacers, decorations or their purpose is already described by the content should include a "role" attribute that equals to "presentation" or "none".	No	0	0	-
